Special Interests: My work as a Teen Volunteer during this past summer at High Point Regional Hospital has been educational and very enlightening. I learned how to multi-task, about the importance of customer service as well as how nervous people can be about visiting the hospital. I was able to help them feel better by assuring them that the doctor was very nice. My volunteer experience there has greatly affected me in many ways. I was able to work with patients in a small capacity to help make them feel better as they went through various treatments. These experiences combined help support an inner attraction to the study of medicine. I enjoy rollerblading, reading Suzanne Collins novels and playing with my cousins.

Educational Plans and Career Goals: I would like to attend a four-year university in August 2021, but I am undecided on my college major at this time. I am very interested in science, so perhaps a degree in Biology will most interest and benefit me. I am interested applying to Appalachian State, East Carolina, Elon University, and UNC-Greensboro because I have researched those campuses and find them appealing in many ways for my academic needs. I have thought about becoming a doctor one day, perhaps a family practitioner, although I am keeping all of my options open at this time.

THIS IS A SAMPLE STUDENT DATA SHEET-
USED FOR SCHOLARSHIP APPLICATIONS,
VOLUNTEER APPLICATIONS, AND FOR
RECOMMENDATIONS WRITTEN BY
TEACHERS/OTHER INDIVIDUALS. Feel free to
create your own using the format you are
most comfortable with. Under Community
Service, make sure to give a short
description of your activities using action
words that describe "***what***" you specifically
did - **see below**
